

The New Door on the Block

The **Quad** Door

EAGLE
ALUMINIUM

The newly developed **Quad Seal** is a SANS 613 certified mid-range single-glazed sliding door. This door is great value targeting discerning buyers who require a SANS certified product with specifications between our Patio and Heavy Duty Sliding Door.

It is ideally suited for residential and light commercial applications, offering an attractive contemporary look.

The name derives from the 4 rows of weatherpile at all vertical meeting points, which out-perform SANS 613 air, water, U-value and SHGC allowances.

Adjustable stainless steel tandem rollers ensure smooth and trouble-free operation, whilst also allowing for an 80kg panel capacity.

Profiles are minimalistic, yet robust and elegant, providing substantial daylight openings.

Performance

- 4 rows of weatherpile at all vertical meeting points
- Air leakage 81% better than specified

Features

- Compatible with 105mm or deeper C44 frames
- CISA hook lock for added security

Configuration

- Available in 2, 3, 4 & 6 panel options
- Compatible with Eagle Patio Door Sidelight
